

# PROFESSIONAL DISINFECTION SOLUTIONS

## Re-Occupancy ACTION PLAN

Are you ready  
to re-open?

Preparing your facility and interim operations for your day to day return. With the serious responsibility of protecting your employees' and customers' health, it is important to consider the following:

### 1 Cleaning & Disinfecting

Prior to re-occupancy and possibly periodically thereafter, it may be necessary to clean and apply disinfectant to interior occupied spaces, and mechanical systems.

### 2 Manage Risk

Focus on breaking the chain of transmission, maintaining environmental conditions is of primary importance.

### 3 Certified Specialists

Why would you use your employees or a janitorial company instead of a certified COVID-19 service provider? Providing the right cleaning chemicals, safety equipment needed.

### 4 Reduce Downtime

Our deep cleaning services and applying disinfectant at your facility will help reduce the risk of infection or illness, cross contamination and downtime in business.

### 5 Ongoing Partnership

We can also provide ongoing cleaning services and products to help maintain your operations keeping your employees, tenants, customers and guests safe.
